* This information is provided for your convenience and is very general in nature. Your results may vary *

♦ Aggregates: Approximately 100 square feet, 2" thick – if your aggregate is bigger than 2", you must adjust accordingly. All aggregates contain varying degrees of fine material, including dirt. This is how it is sold to us and how we sell it to you. Super Saks contain approximately 1.5 tons

♦ Stacking wall stone: Will build a wall approximately 30' long, 1' high per 1.5 ton pallet. Note: Some pallets contain less than 1.5 tons

♦ Irregular flagstone: Approximately 150 square feet per ton (1" average) – 100 square feet per ton (1.5" average).

Note: Coverage will vary according to the amount of trimming/shaping or the density of the material.
